

TECHSOFT – connecting technologies

3DCaliper – Packages (all licenses are Floating)

3DCaliper Professional

A product development tool that helps drive efficient product design by automating the analysis of 3D CAD geometry to check proper wall thickness, minimum clearances, and other critical measurements.

Note: 3DCaliper is integrated in PTC Creo Parametric, but this version can also be used to analyze non-PTC Creo Parametric data through the use of neutral formats like IGES/STEP.

Includes: Bundle (Wallcheck, Compare and Clearance)

Prerequisite: PTC Creo Parametric

TECHSOFT – connecting technologies

3DCaliper – Packages (all licenses are Floating)

3DCaliper Wallcheck

A product development tool that helps drive efficient product design by automating the analysis of 3D CAD geometry to check proper wall thickness.

Programm Version 4.0 (or former versions) support the check of thin walls.

Programm Version 4.1 will support the check of thin and also thick walls.

Note: 3DCaliper is integrated in PTC Creo Parametric, but this version can also be used to analyze non-PTC Creo Parametric data through the use of neutral formats like IGES/STEP.

Includes: Base Package

Prerequisite: PTC Creo Parametric

3DCaliper – Packages (all licenses are Floating)

3DCaliper Compare

A product development tool that helps drive efficient product design by automating the analysis of 3D CAD geometry to check proper wall thickness, minimum clearances, and other critical measurements.

Note: 3DCaliper is integrated in PTC Creo Parametric, but this version can also be used to analyze non-PTC Creo Parametric data through the use of neutral formats like IGES/STEP.

Includes: Base Package

Prerequisite: PTC Creo Parametric

3DCaliper – Packages (all licenses are Floating)

3DCaliper Clearance

A product development tool that helps drive efficient product design by automating the analysis of 3D CAD geometry to check minimum clearances.

With 3DCaliper's distance measurement, user can check the tool for observing minimum distances between mould, cores, and sliders.

Note: 3DCaliper is integrated in PTC Creo Parametric, but this version can also be used to analyze non-PTC Creo Parametric data through the use of neutral formats like IGES/STEP.

Includes: Base package

Prerequisite: PTC Creo Parametric

3DCaliper – Packages (all licenses are Floating)

3DCaliper Professional - Global License

A product development tool that helps drive efficient product design by automating the analysis of 3D CAD geometry to check proper wall thickness, minimum clearances, and other critical measurements.

Note: 3DCaliper is integrated in PTC Creo Parametric, but this version can also be used to analyze non-PTC Creo Parametric data through the use of neutral formats like IGES/STEP.

Includes: Global license

Prerequisite: PTC Creo Parametric

TECHSOFT – connecting technologies

3DCaliper – Packages (all licenses are Floating)

Upgrade to 3DCaliper Professional - Global License

Upgrade from 3D Caliper Professional with active maintenance to 3D Caliper Professional global license. 3D Caliper Professional includes the modules Wallcheck, Compare and Clearance.

Note: 3D Caliper Professional with active Maintenance, PTC Creo Parametric

Includes: Global license

Prerequisite: 3DCaliper Professional with active maintenance, PTC Creo Parametric

TECHSOFT – connecting technologies

3DCaliper – Packages (all licenses are Floating)

Low End Upgrade to 3D Caliper Professional

Upgrade from 3D Caliper Wallcheck with active maintenance to 3D Caliper Professional.
3D Caliper Professional includes the modules Wallcheck, Compare and Clearance.

Note: 3DCaliper is integrated in PTC Creo Parametric, but this version can also be used to analyze non-PTC Creo Parametric data through the use of neutral formats like IGES/STEP.

Includes: License upgrade

Prerequisite: 3DCaliper Wallcheck with active maintenance, Pro|ENGINEER

TECHSOFT – connecting technologies

3DCaliper – Packages (all licenses are Floating)

High End Upgrade to 3DCaliper Professional

Upgrade from 3D Caliper Compare or Clearance with active maintenance to 3D Caliper Professional. 3D Caliper Professional includes the modules Wallcheck, Compare and Clearance.

Note: 3DCaliper is integrated in PTC Creo Parametric, but this version can also be used to analyze non-PTC Creo Parametric data through the use of neutral formats like IGES/STEP.

Includes: License upgrade

Prerequisite: 3DCaliper Compare or Clearance with active maintenance, PTC Creo Parametric
