# Publish UI

windchill®   Plug and Play Extension

OVERVIEW

Includes all the same features as Publish Utils - but it adds a user interface allowing administrators or users to select a set of items that should be published. It supports all objects of Windchill and allows the users to have emails sent to them to indicate the publishing has been completed.

FEATURES

- Publishes from the Structure Browser
- Publishes single object or all objects in container
- The destination folder can be configured
- Allows to publish on a Change Notice
- Allows to publish on a Workflow
- Rules can be set for the publish
- Checks the publishing status of objects and returns message
- Sends an email notification when the publishing job is complete
- Publishes Change Notice and Promotion Notice?

Publish directly from the Structure Browser
